

Shubh Garg

Full-Stack Developer

jan22.sg@gmail.com | linkedin.com/in/shubh-garg-22x1

PROFILE

Full-stack developer building end-to-end product systems across React interfaces, backend services, data workflows, cloud delivery, and developer automation. I focus on understandable user experiences, reliable architecture, and practical ownership from ambiguous requirements through production delivery.

SELECTED INDEPENDENT WORK

Real-Time Options Intelligence and Replay Platform

Independent product | Work in progress | 2026 - Present

- Built a React, TypeScript, FastAPI, PostgreSQL, Redis, and WebSocket platform for live Indian index options analysis, point-in-time replay, backtesting, mock execution, journaling, and advisory decision support.
- Designed separate freshness paths for ticks and option-chain snapshots, reconnect and stale-feed handling, and replay safeguards that prevent future data from leaking into historical analysis.

Cloud-Native Options Market Data Pipeline

Independent production-grade project | Completed | 2026

- Built a Python ingestion service for Dhan option-chain Greeks and futures prices with market-session gates, token renewal, retries, rate limits, dynamic instrument resolution, and idempotent PostgreSQL writes.
- Delivered with Docker, AWS ECS Fargate, RDS PostgreSQL, Secrets Manager, CloudWatch, GitHub Actions, migrations, health checks, and 32 automated tests guarding critical paths before deployment.

EXPERIENCE

Freelance Full-Stack Developer

Independent, Remote | May 2026 - Present

- Building product systems across interfaces, APIs, real-time data views, cloud delivery, and reliable user workflows.

Member of Technical Staff - Full Stack

Sprih Inc., Pune (Onsite) | June 2023 - May 2026

- Joined the early engineering team and owned production features across sustainability dashboards, facility and user management, data workflows, reporting surfaces, and Java-backed API integrations.
- Architected SprihCharts, a reusable D3.js visualization foundation used across data-heavy product surfaces.
- Improved delivery through reusable React patterns, async workflow visibility, Playwright automation, AI-assisted E2E skills, Vite, and pnpm tooling.

Software Developer Intern

Sprih Inc., Pune (Onsite) | June 2022 - April 2023

- Developed reusable responsive interfaces, integrated REST APIs, and contributed to dashboard and product workflows from design through implementation.

EDUCATION

B.Tech in Computer Science

Madhav Institute of Technology and Science, Gwalior | August 2019 - May 2023

TECHNICAL SKILLS

Frontend: React, TypeScript, Redux, Material UI, D3.js, Recharts, Tailwind CSS, responsive UI

Backend and data: Java, Spring Boot, Node.js, Express, FastAPI, Python, PostgreSQL, Redis, Kafka, REST APIs, WebSockets

Cloud and delivery: AWS ECS, RDS, Docker, GitHub Actions, Vite, pnpm

Quality and workflow: Playwright, Cypress, Jest, AI-assisted development, Codex, Cursor, MCP, custom skills
